

JUNGIAN MAGICK

NYAL RUEHLEN

From an early age I have been fascinated with psychology and the mysteries of the mind. This interest deepened when I discovered the work of Carl Jung, whose exploration of the unconscious resonated profoundly with me. Alongside this, I began to explore Magick as a complementary tool to unlock deeper layers of consciousness and self-awareness. Through the fusion of Jungian psychology and Magick, I've been able to cultivate a richer, more balanced understanding of myself and the world around me.

ALCHEMICAL PSYCHOLOGY: JAMES HILLMAN

Alchemical Psychology draws on the symbolic and transformative processes of alchemy to explore the depths of the human psyche. By emphasizing the metaphorical and imaginative aspects of alchemical transformation, Hillman aligns closely with the principles of magick. His work offers a valuable lens for understanding the deep dimensions of the soul.

MAN AND HIS SYMBOLS: C.G. JUNG

Man and His Symbols is a seminal work for the study of magick, offering a psychological framework for understanding how the unconscious shapes human experience and perception. Jung argues that the unconscious communicates through symbols, which play a vital role in transformation and self realization—concepts that resonate within magical practices. By exploring how symbols and archetypes function, individuals can gain insight into the ways they influence their inner world. In this sense, Jung's work provides a crucial foundation for both magical theory and practice, illuminating the pathways through which the unconscious guides personal growth and spiritual development.

THE GODS OF THE EGYPTIANS: E.A. WALLIS BUDGE

The Gods of the Egyptians is a comprehensive exploration of ancient Egyptian mythology, focusing on the pantheon of gods and goddesses, their roles in creation, and their symbolic meanings. Budge discusses the religious traditions of Egypt, examining the myths, rituals, and cultural significance of these deities. The book serves as a key resource for understanding the psychological world of ancient Egypt, offering insights into how these gods shaped the lives and beliefs of the ancient Egyptians.

THE MYSTICAL QABALAH: DION FORTUNE

The Mystical Qabalah examines the Kabbalistic Tree of Life as a map for gaining psychological growth and power, closely resembling Jung's concept of archetypal patterns. Both Fortune and Jung view self discovery as a journey of integrating unconscious aspects of the psyche. With its profound symbolism pointing towards archetypal forces, the Tree of Life provides a powerful framework for navigating this inner work.
